

ELICITATION TECHNIQUES

Brainstorming :

Title : Warehouse Management system for farmers

Facilitator: TA Prutha Patani

Participants : Group Members

Goal : To find out actors of the project and their requirements

Research : Some websites

Ideas :

- 1) Farmers can check the deposit date and the due date of each crop added.
- 2) Farmers can select the best warehouse for them.
- 3) Farmers must have the details of the warehouse supervisor.
- 4) Farmers must be able to renew their allotment of a specific type of crop.
- 5) Farmers must be able to book an advance slot for their upcoming crops.
- 6) Supervisor must be able to see the list of farmers whose crops are present in that warehouse.
- 7) Supervisor must be able to see the amount of money paid by the farmers.
- 8) Supervisor should also know the list of staff working in that warehouse.
- 9) Supervisor should have the contact details of the farmers whose crops are present in that warehouse.
- 10) Supervisor must know the due date of all crops present.
- 11) Admin should be able to see the space occupied in each warehouse
- 12) Admin should be able to know the list of the staff working in the specific warehouse.
- 13) Admin should be able to know the list of the farmers whose crops are in a specific warehouse.

- 14) Admin must know the amount of money obtained from each farmer.
- 15) Farmers should know the address of all the warehouses without login.
- 16) Farmers should be able to edit their profile page.
